Faculty of Medicine – Al-Azhar University,
New Damietta.

Core Research Pillars

Maternal & Fetal Medicine

Gestational Age Diagnostics

Preeclampsia Prediction

Cerebro-Placental & Umbilical Assessments

Robson Classification

Gynecologic Oncology

Ovarian Carcinoma
Surgical Staging

Endometrial Carcinoma
Management

Systematic Lymphadenectomy

Sentinel Lymph Node Mapping

Reproductive Endocrinology

Polycystic Ovary Syndrome
(PCOS)

Ovulation Outcome
Prediction

Insulin Resistance Markers
(HOMA-IR)

Highlighted Publications – Maternal & Fetal Health

Evaluation of third trimester gestational age using fetal maximum transverse cerebellar diameter

International Journal of Medical Arts (2025)

Cerebro-Placental Ratio, Umbilical & Middle Cerebral Arteries' Pulsatility Indices in Predicting Preeclampsia

Evidence Based Women's Health Journal (2025)

Role of Umbilical Cord Diameter in Detection of Gestational Age in Pregnant Women

International Journal of Medical Arts (2025)

Impact of Application of Robson Classification On Rate of Cesarean Section in Al-Azhar University Hospital

International Journal of Medical Arts (2025)

Highlighted Publications – Oncology & Endocrinology

Indicators of systematic lymphadenectomy as a part of surgical management in ovarian carcinoma patients

Journal of Carcinogenesis (2025)

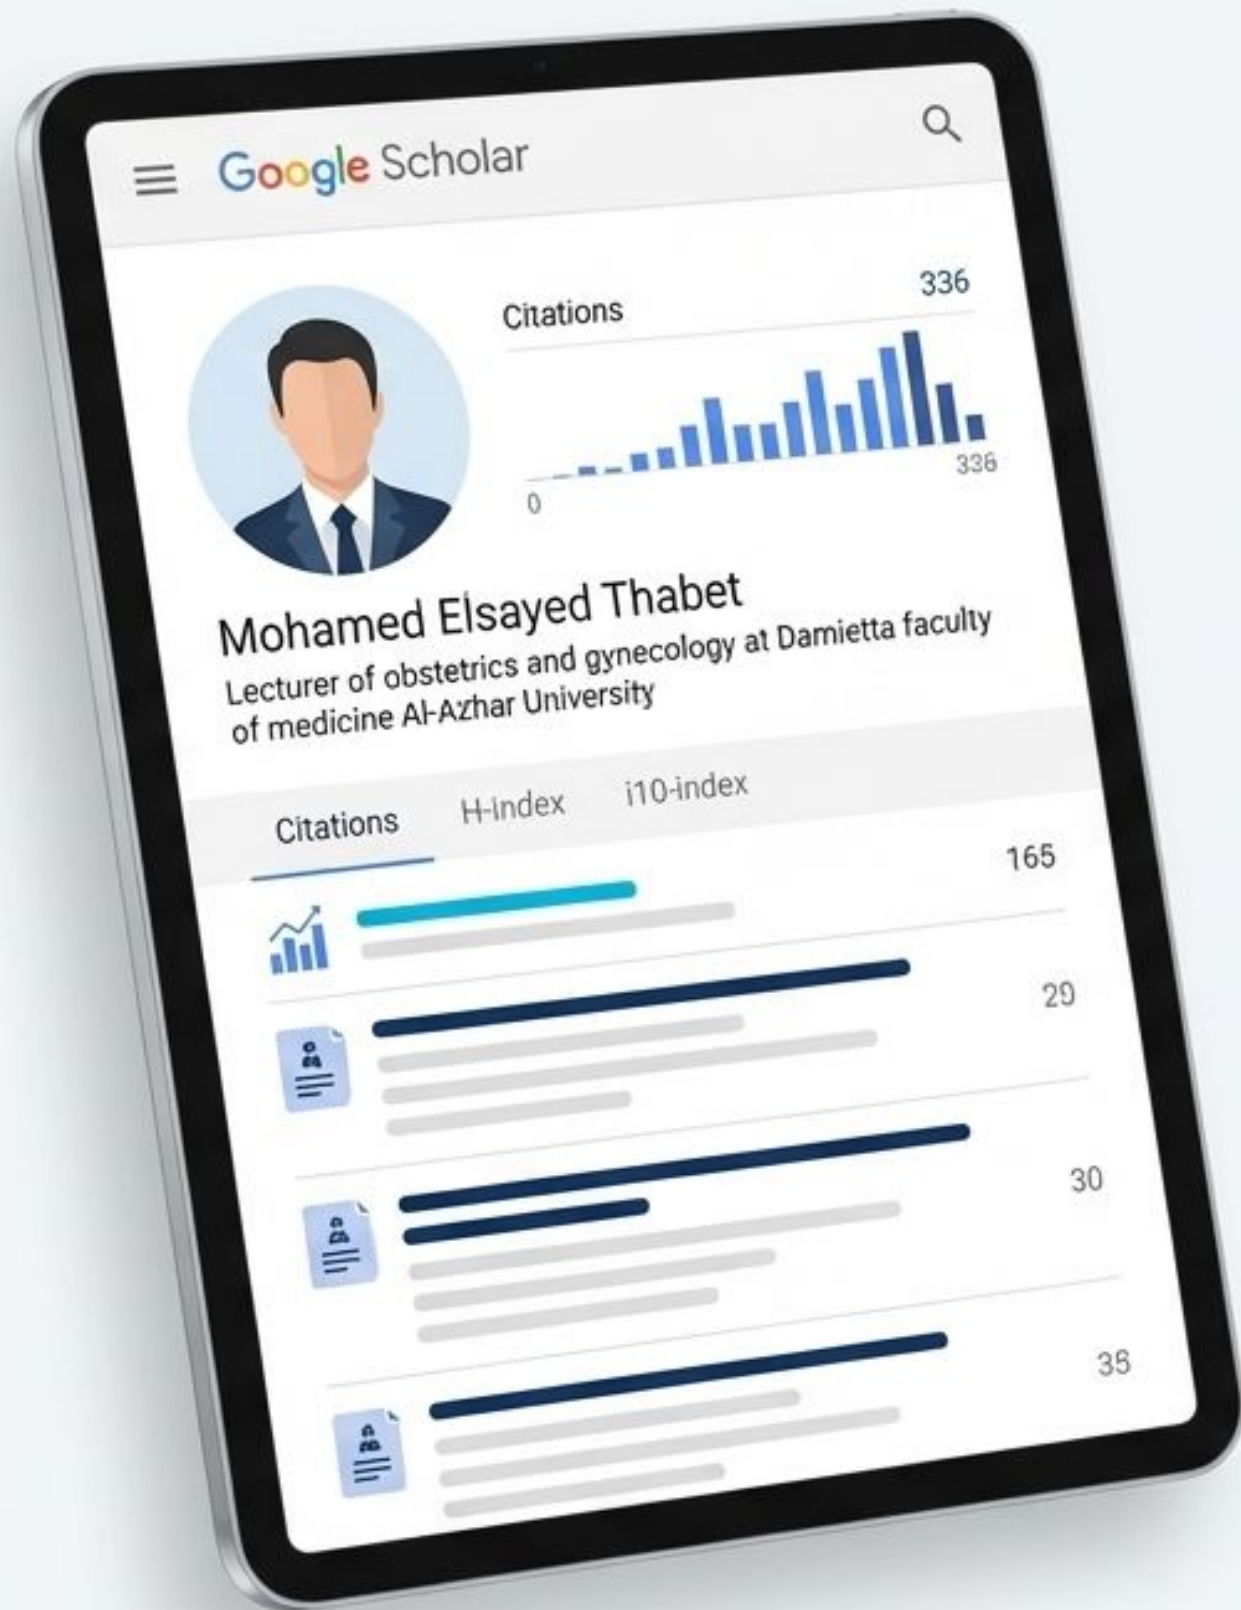

Impact Of Sentinel Lymph Node Mapping In Surgical Management Of Patients With Apparent Early Stage Endometrial Carcinoma

Diabetic Studies (2025)

HOMA1-IR vs HOMA2-IR in Prediction of Ovulation Outcome in Patients with PCOS

Evidence Based Women's Health Journal (2025)
